

WEB APPLICATION DEVELOPMENT

LIHQ's professional team of skilled programmers specialize in the building of custom applications for use within your corporate intranet or website. We understand the sometimes-complicated ins and outs of backend databasing and application processing, both on and off the Internet. We build what you want, how you want it. We pride ourselves on meeting your specific needs for any given project.

- Custom Membership Systems
- Administrative Web GUI's
- Custom E Commerce Systems
- Integration of existing data/inventory systems to the Internet
- Network management via web Interface
- Automated database conversion systems

We look forward to hearing from you to set up an appointment to further discuss how we may assist you with starting a new project or better helping you manage an existing application.

Please call our office or send e-mail to sales@pb.net.
